

Attacks on Health Care in Sudan

16-30 September 2026

Data by Insecurity Insight shows that since fighting started between the SAF and RSF in April 2023 and 30 September 2026 at least **794 incidents** of violence against or obstruction of access to health care took place across Sudan:

- **health facilities were damaged 224 times**
- **221 health workers were killed, 16 kidnapped and 142 arrested**

Drone strikes damaging health facilities surged by 88% in the first eight months of 2026, rising from **16** such cases in 2025 to **30** between January and September 2026. Two-thirds of these incidents were attributed to the RSF, with health facilities in Kordofan particularly affected. SAF drone strikes also increasingly damaged health facilities between January and April, mostly in Darfur and Kordofan.

Incidents where health facilities were reportedly damaged by drone strikes in Sudan

Documented incidents

The publicly reported incidents below are not a complete nor a representative list of all incidents that affected the provision of health care between 16-30 September 2026. The incidents below have not been verified through ground investigations. There is a delay in reporting incidents due to our open source verification protocol.

25 September 2026: In Sodari town, North Kordofan state, Sodari Rural Hospital was destroyed and looted by the RSF, cutting off healthcare access for over 50,000 families. The SAF and allied groups retook Sodari town the day before, after heavy fighting with the RSF, which had held the area since the early months of the conflict. **Source:** [Sudan Tribune](#)

This document comprises threats and violence as well as protests and other events affecting the delivery of and access to health care. It is part of the [Attacks on Health Care](#) project by Insecurity Insight. It is prepared from information available in local, national and international news outlets and online databases. The incidents reported are not a complete nor a representative list of all events that affected the provision of health care and have not been independently verified. It is funded and supported by the Tides Foundation. The opinions expressed in it do not reflect in any way the position of the Tides Foundation who is not responsible for the content expressed in this document.

Other resources

Using data collected by Insecurity Insight, the Safeguarding Health in Conflict Coalition (SHCC) identified **134 incidents** of violence against or obstruction of health care in Sudan in 2025. Among incidents reported in 2025, health facilities were damaged or destroyed 40 times, while 54 health workers were killed and 47 arrested. Over three-quarters of the reported incidents affected local health care providers working for national health care structures. Drone strikes impacting health care surged in 2025, increasing from three incidents in 2024 to 24 in 2025. Over 75% of armed drone strikes that impacted health care were linked to the RSF, with high incident numbers reported in North Darfur and North Kordofan states.

Armed drones are an escalating threat in humanitarian settings, with their use expected to grow. Once rare, they are now a defining feature in modern conflicts. Adapting to the growing threat of drones means rethinking security risk measures in high-risk contexts. This practical guide by Insecurity Insight brings together current best practice and is available in [Burmese](#), [English](#), [French](#) and [Spanish](#). Individual resources:
